ACTIVATOR 1,5M

Code : **9430041**

Model : **CER-010**

Description

Activation device with 1,5m of coverage radio for waking up wandering control tag bracelets that are placed near the area to be controlled (door, corridor, etc.) It sends an electromagnetic signal (125KHz) to tag bracelets (CER-030) with its identifier. Once the bracelet receives this signal, it sends a message in 13,56 MHz to the area controller central (CER-025) indicating activator and tag identifiers. As long as the bracelet (CER-030) remains within the range of the activator, it will continuously activate the bracelet until the wanderer leaves the area. The CER-010 activator must always be placed near the area to be controlled (door, corridor, etc.) CER-010 has a range of 1,5 m.
