913 MULTISWITCHES

5X20 FINAL MULTISWITCH, EU PSU

Code : **9130191**

Model : **MB-115**

Description
Final multiswitch for 4 polarities and terrestrial TV with 20 outputs. The outputs are amplified in the satellite IF band. In the terrestrial band they can be configured to function in either active or passive mode. It must be powered from each individual receiver so that the switching and the amplification of each derived output will function correctly. The external power supply unit provides the required voltage to the LNB for them to function properly.

Applications
Medium-sized collective satellite and terrestrial TV installations. Installed individually, they can distribute to as many as 20 TV outlets. When combined with cascadable multiswitches, it is possible to distribute to 40 outlets on a single line.

Characteristics
Shielded metal chassis with plastic supports. F-type connectors. Power supply connector is a 9.5 x 2.1 mm jack to feed the LNB. Same characteristics as model MB-105, with the difference that the power supply in this model comes with an European plug.
