BED CALL UNIT CALL BUTTON & CONNECTOR

Code : **9410088**

Model : **LLC-201**

Description
Room peripheral with a connector for pear-type push-buttons (LLC-21x) and a call button with a red LED. It allows to place a call from the pear-type push-button (LLC-21x) or from the red button in the peripheral. Once the call has been placed, the red LED makes it easy to identify the bed that originated the call, as well as the status of the call. Flush or wall mount.
