# 940 CONTROLLERS

## PERIPHERAL CONCENTRATOR RS-485

Code : **9410328**

Model : **ACC-547**

Description
The ACC-547 accessory consists of a hub / distributor for intelligent bus peripherals with an RJ45 metal terminal connection. It contains 1 input, 1 output and 8 leads. It is a scalable device, allowing the "bridge" connection with more hubs to expand the number of peripherals that can be connected. It allows the "star" connection of the devices and offers the possibility of external power supply by terminal.
DIN rail mounting.
