940 CONTROLLERS

PERIPHERAL CONCENTRATOR RS-485 4 CONNEC.

Code : **9410339**

Model : **ACC-549**

Description

The ACC-549 accessory consists of a hub / distributor for intelligent bus peripherals with a RJ45 metal terminal connection. Contains 1 input, 1 output and 4 leads. It is a scalable device, allowing the "bridge" connection with more hubs to expand the number of peripherals that can be connected. It allows the "star" connection of the devices and offers the external power supply by terminal possibility.
Small sized case/housing.
