ACCESSORIES FOR ENTRANCE PANELS

IPAL FLUSH BOX FOR PDK-20003

Code : **9740229**

Model : **CMO-703**

To embed an entrance panel to the wall, it is necessary to previously place a flush-mount box where we will later fix the plate. This box is made of aluminum. It has some plates that allow to hold the entrance panel during installation, thus facilitating the work of connection and start-up of the different elements of the system.
