IVANDAL MODULE WITH MAGNETIC LOOP

Code : **9770076**

Model : **RVE-025**

Description
Induction loop for pushbutton extension iVANDAL entrance panels. The induction loop module is used to help individuals with reduced ranges of hearing to listen to the audio conversation on the entrance panel via their own hearing aid device (with T switch).
This module has 2 signalling LEDs: a red LED that indicates that is in operation, the green led that flashes during the conversation.This LED light signalling allows a perfect understanding of the entrance panel for the hearing impaired and visually impaired.
