980 COMPLETE MODULES

ALOI PANEL WITH MAGNETIC LOOP

Code : **9800159**

Model : **PNB-600**

The PNB-600 is iVANDAL induction loop module which is used to help individuals with reduced ranges of hearing to listen to the audio conversation on the entrance panel via their own hearing aid device (with T switch). For 2-wire video entry system.
In addition, the sturdiness of the polycarbonate protection window against moisture and heat makes this entrance panel indestructible.
This panel has 2 signalling LEDs: a red LED that indicates that is in operation, the green led that flashes during the conversation.This LED light signalling allows a perfect understanding of the entrance panel for the hearing impaired and visually impaired.
Built in stainless steel AISI 316L with a thickness of 2.5mm and special tamper-proof screws. Attractive and professional finish, Made in Spain.
