974 ACCESSORIES FOR ENTRANCE PANELS

FLUSH-MOUNTED BOX 17-18 STOREYS

Code : **9740015**

Model : **CMO-018**

Description

To embed an entrance panel to the wall, it is necessary to previously place a flush-mounted box where we will later fix the panel. This box is made of PVC. It has hinges that can hold and fold the entrance panel during installation, thus facilitating the work of connection and commissioning of the elements of the panel.
