900 TERRESTRIAL ANTENNAS

ANTENNA, CHANNELS 21/60 REJ, G = 10 DB

Code : **9000103**

Model : **BU-288**

Description
Double array antennas covering the complete gain range. Designed to cover the UHF band up to 790 MHz while rejecting the LTE mobile telephone band. Built-in LTE800 rejection filter. Fast and easy assembly, all the components are premounted and no tools are required for their assembly.

Applications
Digital and analogue terrestrial TV installations, collective or individual, where a strong rejection of the LTE800 band is necessary.

Characteristics
Rejection of LTE800 and GSM signals as well as signals coming from the bottom of the antenna. Robust antenna with great resistance to both sun and saltpetre. Made from aluminium, weather-resistant plastic and galvanised steel. Elevation angle adjustment, mounting in either horizontal or vertical polarity. Includes a balun (symmetrizer), specially designed for the antenna, with F-type connector protected inside the balun box. Packed individually, in multiple packs or unassembled.
