901 PREAMPLIFIERS

UHF 21/60 LTE NEO BALUN

Code : **9010017**

Model : **SI-428**

Balun (symmetrizer) specially designed for NEO-08X and NEO-09X antennas. Designed to cover the UHF band up to 790 MHz while rejecting the LTE800 mobile telephone band thanks ot its built-in rejection filter. F-type connector that stays protected inside the balun box once the balun is installed. Fast and easy assembly, no tools required.

Applications
Digital and analogue terrestrial TV installations, collective or individual, where a strong rejection of the LTE800 band is necessary. Conversion of non-LTE800 antennas or antenna without rejection filters into antennas with built-in LTE800 rejection filters.

Characteristics
Rejection of LTE800 and GSM signals.
