BROADBAND AMPLIFIERS

AMPLIFIER UHF-UHF-BIII/DAB LTE

Code: 9040120

Model: CA-440

Description

Broadband head-end amplifiers with three inputs. Built on a compact chassis, they are capable of supplying a signal to a large number of outlets. Available on request in 125 or 240 V_{\sim} .

Applications

Designed for analogue and digital terrestrial TV installations in mediumsized MATV networks or individual installations. They are used as the headend amplifier of the installation.

Characteristics

Made from ABS plastic, with an internal zamak chassis of which provides maximum shielding. F type connectors which affords a connection with minimum mismatching and high shielding. Power supply unit insulated from the rest of the high frequency circuit, complying with all safety standards.
