

Best practices for the **safe opening** of delivery packages

■ OPEN THE PACKAGE.

Avoid contact with the delivery person and bring the package to a surface that is easily cleanable. Open it.

■ CLEAN YOUR HANDS.

First with water, then with soap. Rub your hands thoroughly for at least 20 seconds.

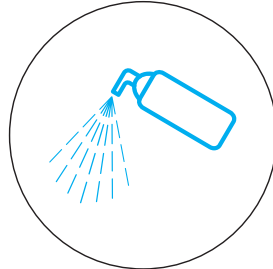

■ TAKE OUT THE MERCHANDISE.

Do not touch the packaging in which it arrived.

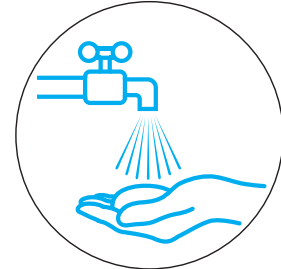

■ BIN THE PACKAGE.

Bin the box or the plastic or paper bag in which the merchandise arrived.

■ DISINFECT THE SURFACE.

Clean the surface where you placed the package with bleach or vinegar.

■ CLEAN YOUR HANDS AGAIN.

Repeat the process: first with water, then with soap. Rub your hands thoroughly for at least 20 seconds.

REMEMBER!

Do not touch your face during the whole process.

Gloves are not necessary if you follow these tips.
